

Tradedly

Tradedly for Insurers

Defensible evidence of “reasonable effort” — without promising outcomes.

Where it fits

- Emergency mitigation / make■safe dispatch
- Supplier response tracking with SLA windows
- AI■initiated actions that require governance

What changes

- One dispatch record replaces scattered emails and calls.
- Clear outcomes: accepted / declined / no_coverage / cancelled / completed.
- Evidence trail to support audit, compliance, and disputes.

What it is not

- Not a marketplace, directory, or ranking engine.
- Not a guarantor of completion.

Risk boundary: Tradedly provides authorised execution attempts + evidence. Tradedly does not perform work, supervise work, or guarantee completion. Providers remain responsible for delivery.
