

Tradedly

Tradedly for Property Ops

Stop chasing contractors. Get clear outcomes for every repair request.

Where it fits

- Reactive repairs and emergency callouts
- Voids and turnarounds
- Compliance jobs where evidence matters

How it helps

- Timeboxed offers: providers must accept or decline.
- If nobody accepts, you see no_coverage (not silence).
- Clear escalation triggers and resident updates.

What you get

- Deterministic outcomes + timestamps
- Audit trail without extra admin
- Safe-by-default outputs (no provider identities exposed)

Risk boundary: Tradedly provides authorised execution attempts + evidence. Tradedly does not perform work, supervise work, or guarantee completion. Providers remain responsible for delivery.
